Rage Bait: How Online Anger Makes Money

Name: _____

Class: _____

Score: _____ / 20

No.	Sentence
1	Rage bait refers to online material created to make users feel _____.
2	A provocative post can attract reactions, raise traffic and bring financial _____ to the creator.
3	Some creators chase more _____ because payment rises with audience numbers.
4	The reactions can still be profitable even when they are _____.
5	A normal marketing hook should reflect the content accurately and be based on _____.
6	Unlike a trustworthy hook, rage bait relies on _____ to influence users.
7	Influencers exploit _____ so that users pay more attention to certain content.
8	Algorithmic amplification can finally lead to more _____.
9	Biases are often not deliberate; they may be _____ feelings for or against an idea.
10	By provoking emotions, creators are more likely to capture users' _____.

11 **What distinguishes rage bait from ordinary attention-grabbing online content at the beginning of the discussion?**

- A It mainly uses celebrity gossip to encourage curiosity.
- B It is deliberately designed to produce anger or outrage.
- C It usually asks users to compare different political views.
- D It depends on software that blocks emotional reactions.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 12 **According to the explanation, what usually happens after people react angrily to a provocative post?**
- A The creator immediately removes the original post.
 - B The post becomes less visible because users dislike it.
 - C The audience stops sharing similar content.
 - D The content receives wider attention and traffic.
- 13 **What commercial logic does Andrea Jones identify behind some creators' behaviour?**
- A Higher engagement can mean higher payment.
 - B Negative comments usually reduce creators' income.
 - C Creators are paid only when users feel positive.
 - D Marketing platforms ban content that causes anger.
- 14 **How does Andrea contrast a marketing hook with rage-baiting content?**
- A A hook is usually longer, while rage bait is usually shorter.
 - B A hook avoids emotion, while rage bait avoids online sharing.
 - C A hook should honestly match the content, while rage bait manipulates users.
 - D A hook is used by amateurs, while rage bait is used by professionals.
- 15 **Why does Andrea's view imply that rage bait is worse than clickbait?**
- A It is less truthful and tries to influence people for its own advantage.
 - B It is mainly unsuccessful at attracting online reactions.
 - C It only works when users already agree with the creator.
 - D It is used mostly to teach marketing clients about trust.
- 16 **What does Dr Brady suggest influencers try to exploit?**
- A Users' technical knowledge of algorithms.
 - B Users' desire to avoid advertising.
 - C Users' ability to detect fake headlines.
 - D Users' psychological biases that guide attention.
- 17 **In Dr Brady's explanation, what is the role of algorithms?**
- A They judge whether comments are morally acceptable.
 - B They amplify content that people are likely to notice.
 - C They prevent creators from earning advertising money.
 - D They remove emotional posts from social platforms.

- 18 **What does the informal word "eyeballs" refer to in this context?**
- A People who produce angry online comments.
 - B The emotional biases behind a reaction.
 - C People viewing online content.
 - D The visual design of a social media post.
- 19 **Why can emotional content be especially effective?**
- A Human beings have evolved to pay attention to emotions.
 - B Users are unable to recognise any emotional manipulation.
 - C Algorithms only promote content with positive emotions.
 - D Creators are usually unaware that emotions affect users.
- 20 **What practical response is suggested for users who encounter outrageous content?**
- A Share it quickly so others can judge it.
 - B Comment angrily to reduce its reach.
 - C Follow creators who post more extreme examples.
 - D Pause and think before reacting or sharing.
