

BBC 6 Minute English Listening Practice

A Vaccine For Cancer

Name: _____

Class: _____

Score: _____ / 20

No.	Sentence
1	Around _____ people will be affected by cancer in their lifetime.
2	Cancer involves cells growing out of control and causing _____.
3	In 2022, malignant cancers caused about _____ deaths worldwide.
4	Vaccines protect the body by making it _____ to a disease.
5	The development of mRNA is described as a sudden important _____.
6	Cancer can avoid attack by hiding from the body's _____.
7	Cancer cells may put _____ on their surface to mislead the immune system.
8	Chemotherapy can attack the cancer but also damage _____.
9	New vaccines train the immune system in cancer-cell _____.
10	The aim of vaccines is the _____ of the immune system.

11 **How does the opening description distinguish benign from malignant tumours?**

- A Benign tumours grow faster than malignant tumours.
- B Benign tumours are not cancerous, while malignant tumours are cancerous.
- C Benign tumours are always fatal, while malignant tumours are harmless.
- D Benign tumours affect only children, while malignant tumours affect adults.

12 **What basic function of vaccines is explained near the start?**

- A They remove tumours through surgery.
- B They replace chemotherapy in every patient.
- C They make cancer cells grow more slowly.
- D They protect the body by creating immunity.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **Why does the immune system not automatically fight cancer effectively?**
- A Cancer can hide from the body's natural defences.
 - B The immune system only works after chemotherapy.
 - C Cancer cells are always outside the body's tissues.
 - D Vaccines make the immune system less active.
- 14 **What is the purpose of the "Go away! There's nothing here to look at!" image?**
- A To show that cancer cells communicate with doctors.
 - B To suggest cancer can be removed by moving patients away.
 - C To illustrate how cancer cells mislead the immune system.
 - D To argue that immune therapy has failed over the past decade.
- 15 **Why is the phrase "Nothing to see here!" used in the explanation?**
- A It explains how cancer hides by pretending there is no threat.
 - B It warns that cancer research is impossible to observe.
 - C It describes how police officers treat cancer patients.
 - D It shows that healthy cells are more dangerous than cancer cells.
- 16 **In this context, what does it mean that cancer "hijacks" healthy cells?**
- A It repairs healthy cells after chemotherapy.
 - B It asks healthy cells to create vaccines.
 - C It destroys all healthy cells immediately.
 - D It takes control of something for its own advantage.
- 17 **How are existing treatments like chemotherapy contrasted with new vaccines?**
- A Chemotherapy is natural, while vaccines damage healthy tissue.
 - B Chemotherapy can harm healthy tissue, while vaccines aim to target cancer cells naturally.
 - C Chemotherapy teaches the immune system, while vaccines directly attack all tissue.
 - D Chemotherapy and vaccines work in exactly the same way.
- 18 **What problem does Professor Sanchez identify in the immune system of cancer patients?**
- A It has become too aggressive against every healthy cell.
 - B It refuses to respond to any form of treatment.
 - C It has lost the ability to recognise cancer-cell abnormalities.
 - D It attacks vaccines before they can enter the body.

19 **What does the vaccine try to do when the immune system is "blind" to cancerous growths?**

- A Teach it to notice the danger and behave differently.
- B Make it ignore cancerous growths more completely.
- C Replace it with chemotherapy.
- D Stop it from recognising any abnormal cells.

20 **What broader conclusion is drawn about cancer treatments and vaccines?**

- A Only vaccines should be used because other treatments no longer work.
- B Natural defences are useless once cancer has appeared.
- C Chemotherapy and vaccines must never be used together.
- D Different approaches may be used together or separately.
