11 **How does Danielle feel about the crunch of a fresh apple?**

- A She finds it deeply enjoyable and personally meaningful.
- B She thinks it is pleasant but not worth discussing.
- C She mainly values it because it is fashionable.
- D She dislikes it unless the apple is cooked first.

12 **Why does Danielle mention growing up around apples?**

- A To explain why she avoids most other crunchy foods.
- B To prove that all apples have the same texture.
- C To show the source of her detailed understanding of apple crunch.
- D To argue that orchards are better than supermarkets.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **What does crunchy texture prepare the body for?**
- A A sweeter flavour than soft food.
 - B Raw and rough fibre that supports chewing development.
 - C A longer period of digestion after meals.
 - D The need to drink more water with food.
- 14 **What happens after the first bite, according to Danielle?**
- A The body immediately rejects all soft food.
 - B The person stops noticing the food's texture.
 - C The sound becomes less important than the colour.
 - D The person receives information before deciding whether to swallow.
- 15 **What example is used to show that the first bite can warn us about food quality?**
- A Biting into a mushy apple and refusing it.
 - B Picking fresh apples from a tree.
 - C Eating roasted beetles with salt.
 - D Finding carrots too hard to chew.
- 16 **What main information can crunch give about food?**
- A Whether the food is expensive.
 - B Whether the food was cooked recently.
 - C Whether the food is of good quality.
 - D Whether the food contains enough sugar.
- 17 **Why might humans be naturally attracted to a loud crunch?**
- A It always means the food is sweet.
 - B It shows the food was difficult to prepare.
 - C It proves the food contains animal protein.
 - D It can signal freshness and safety.
- 18 **What contrast is introduced after the benefits of crunchy food are discussed?**
- A Fresh apples are healthy, but carrots are not.
 - B Crunchy insects may feel more difficult to accept than apples or carrots.
 - C Astronauts prefer soft food when they return to Earth.
 - D Crunchy food is enjoyable but never nutritious.

19 **How does Dulsie try to make insect protein more acceptable?**

- A By using the insects' crunchy texture and presenting them as a cheap meat alternative.
- B By hiding the fact that the food contains insects.
- C By claiming insects taste exactly like apples.
- D By serving insects only to professional chefs.

20 **What does Dulsie's answer suggest about her attitude towards insects now?**

- A She still avoids eating them directly.
- B She only accepts them when mixed with fruit.
- C She has found several enjoyable ways to use them in food.
- D She believes insects should replace all meat immediately.
