

BBC 6 Minute English Listening Practice

The Future Of Food

Name: _____

Class: _____

Score: _____ / 20

No.	Sentence
1	The UK brings in around _____ of its food from other countries.
2	The supply chain can be affected by wars, shortages and increasingly by _____.
3	Having enough reliable, affordable and healthy food for everyone is called _____.
4	The government report lists risks including _____, droughts and water shortages.
5	Scientists modelled how _____ might threaten UK security.
6	The report's conclusions were described as _____, meaning severe and clear.
7	Food production produces around _____ of all greenhouse gases.
8	In agriculture, the largest share of emissions comes from keeping _____ on farmland.
9	One proposed shift is to eat less meat and dairy and choose more _____.
10	If a cow or sheep is removed, the land could be used for something else, for example a _____ or vegetable crop.

11 **What concern about the UK food supply is introduced at the beginning?**

- A British consumers no longer buy imported food.
- B The food system depends on vulnerable international supply chains.
- C Fresh food can only be produced in South America and Asia.
- D Supermarkets have stopped selling affordable healthy food.

12 **What does "food security" mean in the discussion?**

- A Buying only food produced within one country.
- B Protecting farms from all political conflicts.
- C Knowing the exact origin of every product.
- D Having reliable access to affordable and healthy food.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **Which set of issues does the government report link to Britain's food supply?**
- A Conflicts, droughts, water shortages and biodiversity loss.
 - B Higher supermarket prices, food waste and restaurant demand.
 - C Reduced packaging, local calendars and consumer curiosity.
 - D New farming jobs, cheaper imports and more European trade.
- 14 **What does the quoted first line of the report imply?**
- A Food supply risks are limited to farming profits.
 - B Ecosystem damage is mainly a local gardening issue.
 - C Environmental breakdown can become a national-security threat.
 - D Biodiversity loss has already stopped all UK food imports.
- 15 **Why is food production presented as part of the climate problem?**
- A It prevents people from buying vegetables from Europe.
 - B It accounts for a large share of greenhouse gas emissions.
 - C It mainly depends on calendars used in home kitchens.
 - D It removes the need for diesel, fertilisers and livestock.
- 16 **According to Emma Pinchbeck, what is the biggest source of agricultural emissions?**
- A Transporting imported vegetables across Europe.
 - B Growing beans and lentils for non-animal protein.
 - C Using calendars to plan seasonal food choices.
 - D Keeping livestock such as cows or sheep on land.
- 17 **What change in land use does Emma suggest should be considered?**
- A Replacing some cows or sheep with other productive uses of land.
 - B Leaving all farmland unused to protect biodiversity.
 - C Increasing livestock numbers to improve food security.
 - D Moving every farmer away from food production completely.
- 18 **What does "a piece of the puzzle" refer to here?**
- A A small section of the government report.
 - B A confusing part of supermarket labelling.
 - C One part of solving food security and climate problems.
 - D A farming method that only works with dairy products.

19 **Why are fruit trees and vegetable crops mentioned?**

- A To show that imported food is always cheaper.
- B To give examples of alternative uses for land after reducing livestock.
- C To argue that cows and sheep should be replaced only by trees.
- D To explain why farmers should stop producing food entirely.

20 **What broader message does the discussion give about farmers and landowners?**

- A They can help address climate change if land use is redesigned.
- B They are solely responsible for the UK's food-security problems.
- C They should be excluded from climate policy decisions.
- D They can solve food supply risks without changing production habits.
