

BBC 6 Minute English Listening Practice

Love The Foods You Hate

Name: _____

Class: _____

Score: _____ / 20

No.	Sentence
1	Food preferences may partly come from _____, which can affect how people perceive certain ingredients.
2	One example is _____: some people may experience its smell or taste differently.
3	However, dislike is not only biological; there is also a strong _____.
4	One technique for changing reactions to disliked food is called _____.
5	In one example, people are offered _____ to make an unusual food easier to try.
6	After trying it, many people realise there is nothing naturally _____ about the food itself.
7	The eating experience may be compared to a small piece of _____.
8	A negative reaction can develop after someone once became ill from eating _____.
9	The person may connect the illness with having had a _____.
10	Avoiding the food afterwards is described as a kind of _____.

11 **What is the main point made about why people dislike certain foods?**

- A Food dislikes are mostly created by childhood habits.
- B Food dislikes can come from both biology and experience.
- C Food dislikes are usually caused by cultural pressure.
- D Food dislikes disappear once people try the food again.

12 **Why is coriander mentioned in the discussion?**

- A To show that some foods are disliked because they are unfamiliar.
- B To explain why strong-smelling foods are usually unhealthy.
- C To suggest that people should avoid foods with a sharp taste.
- D To illustrate that genetics can affect smell and taste.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **How does the speaker summarise the expert's view after the first extract?**
- A The way people sense food can be shaped by both genes and learning.
 - B People usually dislike foods because they have never eaten them before.
 - C Genetic differences are less important than cooking methods.
 - D Most people can change their food preferences immediately.
- 14 **In this context, what does "hard-wired" mean?**
- A A reaction that is taught deliberately by parents.
 - B A habit that appears only in adulthood.
 - C A response that happens automatically, often because of genetics.
 - D A preference that changes whenever the food is disguised.
- 15 **What does the technique of masking involve?**
- A Pairing an unwanted food with something the person already likes.
 - B Removing the smell of a food before it is served.
 - C Replacing disliked foods with foods from another culture.
 - D Telling people the food is different from what it really is.
- 16 **What does the example of chocolate-covered insects suggest about food dislike?**
- A People reject insects because they always taste bitter.
 - B Parents are usually more adventurous eaters than children.
 - C Sweet foods can permanently remove all food fears.
 - D The idea of a food can be more off-putting than its actual taste.
- 17 **After people actually eat the masked food, what do they often discover?**
- A The food is difficult to chew.
 - B The food itself is not naturally unpleasant.
 - C The food tastes exactly like ordinary chocolate.
 - D The food should be eaten only in small amounts.
- 18 **How can one bad experience with food influence someone later?**
- A It can make the person prefer stronger flavours.
 - B It can make the person forget what made them ill.
 - C It can cause the person to link that food with illness.
 - D It can prove the food is unsafe for everyone.

19 **When food is described as "dodgy", what may be implied?**

- A It may be old, undercooked, or able to make someone sick.
- B It may be expensive but popular with most people.
- C It may be unfamiliar because it comes from another culture.
- D It may be healthy but unpleasant-looking.

20 **What does "avoidance" refer to in the discussion of food fears?**

- A Trying a food repeatedly until it becomes familiar.
- B Covering a food with a taste that is already liked.
- C Checking whether a food has gone bad before eating.
- D Keeping away from a food because of a negative association.
