

BBC 6 Minute English Listening Practice

Why You Need a Good Night's Sleep

Name: _____

Class: _____

Score: _____ / 16

No.	Sentence
1	People who get enough of it may live about _____ longer than those who do not.
2	Sleeping leaves people _____, yet its benefits are considerable.
3	After a poor night, a person may struggle to _____ at work.
4	Sleep after learning helps with the _____ of information.
5	During sleep, information moves into _____.
6	Overnight, the brain may work on a problem and find _____ to it.
7	The body's stress response gives priority to _____.
8	When sleep loss continues, the _____ may become less active.

11 **Why does the discussion raise the danger of becoming unconscious each night?**

- A To suggest that sleep's benefits must be substantial despite that danger.
- B To argue that humans have become less exposed to danger over time.
- C To show that people can choose when to become unconscious.
- D To explain why the benefits of sleep cannot be measured.

12 **How may a poor night of sleep affect learning the next day?**

- A It removes information learned long ago.
- B It can make new information harder to take in.
- C It prevents any information from being stored again.
- D It makes familiar problems impossible to solve.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **How is new learning handled during sleep, beyond being stored?**
- A It is kept apart from earlier learning.
 - B It replaces ideas learned in the past.
 - C It is connected with what the person already knows.
 - D It is tested against immediate physical dangers.
- 14 **What further benefit of sleep is described?**
- A It removes the need to concentrate the next day.
 - B It guarantees that every problem will be solved.
 - C It lets the brain stop processing information completely.
 - D It can leave a person feeling rested in the morning.
- 15 **What distinction is made about "sleeping on" a problem?**
- A The phrase means delaying a decision, while the brain may also work on the problem overnight.
 - B The phrase means forgetting the problem, while the brain recalls it only after waking.
 - C The phrase means deciding immediately, while the brain questions the choice overnight.
 - D The phrase means avoiding work, while the brain stores the problem without changing it.
- 16 **How does the interviewee characterise sleep deprivation?**
- A As proof that a person's immune system has failed.
 - B As a brief pause in the body's normal activity.
 - C As a form of stress that activates a survival response.
 - D As a condition caused mainly by stressful employment.
- 17 **Why are money worries and a stressful job mentioned?**
- A They are identified as the two main causes of sleep loss.
 - B They show that financial problems are worse than lost sleep.
 - C They explain how sleeping directly solves daily problems.
 - D They illustrate continuing stress alongside chronic sleep loss.
- 18 **What is a supported implication of continued sleep loss?**
- A Its effects are limited to poor concentration the next day.
 - B It may contribute to wider health problems over time.
 - C It always causes heart disease before immunity changes.
 - D Its effects stop when the survival response begins.
