11 **Which concern frames the discussion of acne?**

- A How teenagers choose among competing skin products.
- B How visible skin problems can affect a person's life.
- C Why doctors classify several kinds of skin condition.
- D Why most skin conditions disappear after adolescence.

12 **How is the range of acne described?**

- A It is limited to marks on the face and neck.
- B It progresses from mild cases to cysts in everyone.
- C It is mainly a condition that begins in adulthood.
- D It includes less severe spots and more serious forms.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **Which group does the doctor identify as the largest among her acne patients?**
- A People in their teenage years.
 - B Women in their forties.
 - C Children before puberty.
 - D Adults of every age equally.
- 14 **An adult dismisses a teenager's mild acne because it is not medically severe. Which response best follows from the doctor's account?**
- A Mild acne always develops into a more serious form.
 - B Mild acne can stop puberty from progressing normally.
 - C Mild acne can still seriously affect social relationships.
 - D Mild acne usually needs treatment through adulthood.
- 15 **How does the explanation of acne's causes challenge a possible social judgement?**
- A It presents acne as linked to inherited and natural processes.
 - B It presents acne as a result of poor personal choices.
 - C It presents acne as a response to pressure from friends.
 - D It presents acne as a problem created by treatment.
- 16 **What can be inferred about the doctor's earlier attempts to manage her acne?**
- A She rejected specialist treatment after trying it.
 - B She received prescriptions through her family doctor.
 - C She tried shop-bought options because specialist care was unaffordable.
 - D She waited until adulthood before trying any treatment.
- 17 **Why does the doctor mention having tried treatments she recommends?**
- A To show that every patient will respond in the same way.
 - B To suggest that professional training is unnecessary.
 - C To explain why she stopped using other treatments.
 - D To show that her advice also draws on lived experience.
- 18 **Which broader message follows from the doctor's later work and the explanation of acne's causes?**
- A Personal difficulties prevent people from supporting others.
 - B A natural condition can be faced with informed support.
 - C Acne should always be managed without professional advice.
 - D Everyone's acne ends at the same stage of adulthood.
