

BBC 6 Minute English Listening Practice

Can Apps Teach You a Language?

Name: _____

Class: _____

Score: _____ / 18

No.	Sentence
1	Apps use _____ to test a recurring set of words.
2	App companies say many apps focus on language for _____ instead of directly teaching rules.
3	Children benefit from constant _____ to the language around them.
4	Research supports some direct teaching of _____ for adults.
5	For adults, matching a child's _____ is not realistic.
6	Adults may have only _____ each week to study a new language.
7	The _____ on exactly how well apps work remains limited.
8	One study compared two groups of _____ learning English.
9	In some _____, app learners improved a little more than classroom learners.
10	The expert wants more studies across apps, teaching approaches and _____.

11 **What similarity is suggested between many apps' stated approach and children's early language learning?**

- A Both begin with formal grammar lessons before language use.
- B Both depend on a few hours of weekly homework.
- C Both can involve learning without direct explanations of rules.
- D Both provide the same amount of language exposure.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 12 **What difference between child and adult learners does the expert emphasise?**
- A Children receive more formal grammar lessons each week.
 - B Adults already know the vocabulary of the new language.
 - C Children use apps more often than adults can manage.
 - D Children encounter the language much more continuously.
- 13 **Which activity best illustrates the direct teaching considered useful for adults?**
- A A teacher explains a grammar rule to learners.
 - B A learner repeats words without an explanation.
 - C A child picks up speech from everyday surroundings.
 - D An app presents situations without discussing rules.
- 14 **Why is a blend of app learning and direct teaching suggested for adults?**
- A Apps make learning grammar impossible for adults.
 - B Adults have limited exposure, while some direct teaching helps.
 - C Classes recreate a child's constant language exposure.
 - D Research has already found the exact best mix of methods.
- 15 **How did the two groups differ in the study's test results?**
- A App learners led in some written grammar tests and appeared to lead in listening.
 - B Classroom learners led in some written grammar tests and appeared to lead in listening.
 - C App learners led in some written grammar tests; classroom learners appeared to lead in listening.
 - D Classroom learners led in some written grammar tests; app learners appeared to lead in listening.
- 16 **What can be inferred from the expert's qualification of the study?**
- A Similar outcomes may not hold for other apps and languages.
 - B Neither group improved on any of the reported tests.
 - C The learners studied for completely different lengths of time.
 - D Written grammar results are never useful evidence.
- 17 **What role might platforms play alongside human teaching?**
- A They might replace the teachers who explain rules.
 - B They might recreate a child's full immersion.
 - C They might remove the need for listening practice.
 - D They might provide repeated practice with language.

18 **What approach follows from the final advice on improving different skills?**

- A Use the app activity with the highest test score for every skill.
- B Combine app work with activities aimed at particular skills.
- C Replace apps entirely with podcasts and speaking partners.
- D Choose one method and use it for speaking, listening, reading and writing.
