| 5   | Deep reading uses more of the _____ than reading at a surface level.                                 |
| 6   | A high volume of material can increase the tendency towards _____.                                   |
| 7   | Reading on screens tends to encourage a _____ understanding, focused on what is easy to grasp.       |
| 8   | The heavy flow of words comes with pings and _____.                                                  |

**11 What tension does the opening discussion illustrate?**

- A Enjoying books can lead someone to avoid digital reading most days.
- B Enjoying books can coexist with frequent reading from screens.
- C Frequent screen use shows that printed books have lost their appeal.
- D Frequent screen use is mainly a deliberate choice to protect one's eyes.

**12 What is the main point of Cowell's comments about reading?**

- A Its chief benefit is to make children better at school examinations.
- B Its value lies chiefly in replacing other forms of entertainment.
- C Its benefits are limited to creativity and intelligence in childhood.
- D It may support personal qualities and later-life advantages.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **Why does the discussion distinguish deep reading from reading in general?**
- A Some of reading's benefits depend on understanding meaning beyond the surface.
  - B Children can read deeply only after learning about digital information.
  - C Deep reading is mainly a way of increasing the number of words read.
  - D General reading is valuable only when it leads to economic success.
- 14 **According to Wolf, what separates deep reading from surface reading?**
- A Deep reading gathers information more quickly than surface reading.
  - B Deep reading depends on knowing the author's intended answer.
  - C Deep reading engages more mental processes to interpret the text.
  - D Deep reading reduces the need to make judgments about the text.
- 15 **Which view best reflects Wolf's point about the amount people read?**
- A The volume matters most because it shows whether readers are literate.
  - B The way people read matters more, while high volume may encourage skimming.
  - C The subject matters most because some texts contain fewer distractions.
  - D The amount matters less only when the material is read from books.
- 16 **What contrast does the discussion draw between screens and books?**
- A Screens tend to encourage surface reading; books can support deeper interpretation.
  - B Screens prevent all critical thought; books guarantee it in every reader.
  - C Screens mainly develop empathy; books mainly provide quick factual information.
  - D Screens and books develop the same skills when readers use them for equal periods.
- 17 **How does the discussion explain why screens can discourage deep reading?**
- A Their physical light makes readers forget the meaning of words.
  - B Their information arrives too slowly for readers to stay engaged.
  - C Their text lacks the comparisons needed for careful interpretation.
  - D Their large flow of words and alerts encourages rapid overview reading.
