Kids and Climate Change

Name: _____

Class: _____

Score: _____ / 13

NO MORE THAN THREE WORDS - A divide between generations

No.	Sentence
1	Some young climate campaigners feel _____ by politicians and adults.
2	Worries about the planet can also create _____ in families and schools.
3	Dealing with the crisis requires _____ from younger and older people.
4	In a UK survey, at least _____ of young people found the future frightening.
5	One teenager pictures climate change as a parasite: its _____ contrasts with the decline of other living things.
6	Another fears environmental loss because there is _____ for people to go.
7	Adults can admit their _____ about exactly how to deal with the crisis, while seeking answers with children.

11 What problem makes cooperation across generations harder?

- A Young people disagree about whether the planet needs protection.
- B Young people feel let down by adults and worry about the future.
- C Adults expect children to agree on a single climate solution.
- D Adults and children have stopped discussing school issues.

12 What is the point of comparing climate change to a parasite?

- A It shows that climate change moves between species.
- B It suggests that nature can recover by itself.
- C It shows that animals suffer more than people.
- D It pictures a threat expanding while other life declines.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **Besides climate change itself, what disturbs the first young interviewee?**
- A The limited action she sees from many people.
 - B The difficulty of explaining climate science to adults.
 - C The way some plants grow faster in warmer weather.
 - D The amount of attention given to young campaigners.
- 14 **What does the second young interviewee's view of Earth suggest?**
- A People should search for another habitable world.
 - B Environmental damage matters mainly to future travellers.
 - C Protecting this planet matters because it cannot simply be replaced.
 - D The planet will remain safe because it is exceptionally rare.
- 15 **What two responses had teenagers encountered when raising their fears with adults?**
- A Being invited to plan action and then asked to lead it.
 - B Being reassured and then asked to ignore the problem.
 - C Being taught the science and then asked to explain it.
 - D Being ignored or told that fixing the planet was their task.
- 16 **How does the psychotherapist advise adults to handle climate conversations?**
- A Save concerns for one planned, detailed discussion.
 - B Wait until children have settled their feelings first.
 - C Make discussion a regular part of family or school life.
 - D Focus each discussion on finding a complete solution.
