11 **Why does the discussion give particular attention to children when describing concerns about smartphones?**

- A Children have stopped using phones mainly for social activities.
- B Children may be more affected by the negative effects being discussed.
- C Children's phone use has already been reduced by family campaigns.
- D Children are the only group whose phone use causes concern.

12 **What does the research cited about girls and social media actually establish?**

- A Frequent social-media use was identified as the direct cause of girls' depression.
- B Girls' delayed brain development was explained by time spent on social media.
- C Girls' anxiety was traced chiefly to phone-related disruption of their sleep.
- D Girls who use social media more are more likely to be anxious or depressed.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **What contrast is highlighted by the figure for British eight-to-eleven-year-olds?**
- A Many children own a smartphone despite concerns about possible harm.
 - B Phone ownership rises sharply between the ages of eight and eleven.
 - C Most children in that age group avoid smartphones although their friends have them.
 - D British children spend more time online than children in other countries.
- 14 **Which change would most directly ease the mother's social worry about withholding a phone?**
- A Her daughter receiving more advice about what she might see online.
 - B Her daughter spending less time using her own device at home.
 - C Her daughter's friends also being able to socialise without phones.
 - D Her daughter learning how to follow more online trends.
- 15 **How did the initial campaign proposal distinguish between smartphones and social media?**
- A It proposed allowing smartphones at fourteen only for school activities.
 - B It proposed waiting until sixteen for a smartphone and fourteen for social media.
 - C It proposed allowing both from fourteen if a parent supervised their use.
 - D It proposed waiting until fourteen for a smartphone and sixteen for social media.
- 16 **Why were people encouraged to establish groups in their own areas?**
- A The original group was full while interest continued to grow.
 - B The founders wanted each group to use a different age policy.
 - C A school rule prevented families from joining groups elsewhere.
 - D The first group had stopped supporting families with younger children.
- 17 **How does the campaign address children's need for friendship?**
- A It lets children keep in touch mainly through the campaign's online groups.
 - B It tries to make phone-free friendship easier through in-person play and talk.
 - C It replaces local friendships with an international network of children.
 - D It gives parents new contacts while children continue relying on phone chats.
