

BBC 6 Minute English Listening Practice

Can Cows Prevent Wildfires?

Name: _____

Class: _____

Score: _____ / 20

No.	Sentence
1	Wildfires are uncontrolled fires in places such as _____.
2	They are common in _____ such as Spain.
3	Today's fires are worse partly because rising temperatures are caused by _____.
4	Forests have grown _____ because too few animals feed on the vegetation.
5	Dense _____ makes forests more likely to catch fire.
6	European ecosystems used to include _____ such as bison and wild horses.
7	Some of those animals disappeared from ecosystems because of _____ and domestication.
8	Rewilding Spain has brought back herds of _____ to central Spanish forests.
9	The cows help because of their _____ and their trampling.
10	Each tauros can eat over _____ of plant material per day.

11 **How are wildfires defined in the programme?**

- A Small planned fires used to manage farms
- B Unplanned fires in places such as forests or grasslands that spread uncontrollably
- C Fires that happen only inside cities
- D Natural fires that never involve human activity

12 **What has made today's wildfires especially severe?**

- A Lower rainfall caused by cows
- B The disappearance of television animal heroes
- C Too many people planting seagrass
- D Rising temperatures linked to climate change

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **Why have some forests become more fire-prone?**
- A There are not enough animals eating the trees, bushes and grass
 - B People have removed all vegetation from forests
 - C The forests have become too wet to manage
 - D The trees have stopped growing completely
- 14 **Which animals are given as examples of former big grazers in Europe?**
- A Dolphins, kangaroos and dogs
 - B Sharks, turtles and wildebeest
 - C Bison, tauros and wild horses
 - D Cows, goats and sheep only
- 15 **What is the result of fewer grazing wild animals?**
- A Grasslands stop growing and fires disappear
 - B Forests and grasslands keep growing unchecked, increasing wildfire risk
 - C Domestic cows become extinct immediately
 - D Spain becomes cooler and wetter
- 16 **What has Pablo reintroduced into central Spanish forests?**
- A Modern fire engines driven by farmers
 - B Herds of wild horses from Australia
 - C Sea turtles that protect seagrass
 - D Herds of tauros similar to extinct aurochs
- 17 **How does trampling help reduce fire risk?**
- A It opens up the forest so flammable vegetation is less densely packed
 - B It turns all vegetation into water
 - C It makes the cows eat less each day
 - D It prevents every future wildfire in Spain
- 18 **What does Beth say tauros eat?**
- A Only grass and nothing else
 - B Only food provided by humans
 - C Grass, leaves, tree branches and bark
 - D Mostly insects and small animals

19 **What does the figure "over 30 kilos a day" suggest about tauros?**

- A They are too small to affect the forest
- B Their eating can remove a large amount of vegetation
- C They eat only when fires begin
- D They need helmets to work safely

20 **What is the programme's overall point about cows in Spain?**

- A They fight fires in the same way as human firefighters
- B They make wildfires more destructive by eating trees
- C Their grazing and movement can help manage vegetation that fuels fires
- D They replace the need for all climate action
