

BBC 6 Minute English Listening Practice

Should Animals Be Kept In Zoos?

Name: _____

Class: _____

Score: _____ / 20

No.	Sentence
1	School visits may help young people understand the value of _____.
2	Zoos may put money into _____ that support animals at risk.
3	These programmes are mainly used to help _____.
4	Female pandas can reproduce only during a _____ of fertility.
5	Some zoo funding is used to encourage difficult animals to _____.
6	Captive animals may show _____, suggesting poor mental health.
7	A zoo cannot fully copy an animal's _____.
8	Stress-related behaviour may include pacing, bar-biting and even _____.
9	Even big enclosures cannot give animals the _____ they would have in the wild.
10	For captive animals, even basic surroundings may be experienced as _____.

11 **What is presented as the main public reason zoos give for existing?**

- A They educate young people about nature protection.
- B They provide entertainment for school groups.
- C They allow children to compare different gorillas.
- D They replace classroom science lessons.

12 **Why does the speaker mention visiting gorillas at Zoo Atlanta?**

- A To show that zoos mainly attract local tourists.
- B To criticise repeated school trips to the same place.
- C To illustrate how zoos can introduce children to conservation.
- D To explain why gorillas are easier to protect in cities.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

- 13 **According to the transcript, why may pandas need help with breeding?**
- A They are too aggressive to live with other pandas.
 - B They reproduce under limited conditions and may be unwilling to mate.
 - C They cannot survive without human-made food.
 - D They usually prefer warmer zoo environments.
- 14 **What role can zoo money play in panda conservation?**
- A It helps pandas avoid contact with people.
 - B It creates new wild habitats for pandas.
 - C It trains pandas to live alone successfully.
 - D It supports ways to encourage pandas to reproduce.
- 15 **What is the activist's first major objection to zoos?**
- A They can harm animals both physically and psychologically.
 - B They charge visitors too much money.
 - C They focus too much on popular animals.
 - D They fail to teach children enough science.
- 16 **Which behaviour is given as evidence that zoo animals may be under mental stress?**
- A Sleeping for longer periods than usual.
 - B Avoiding food offered by keepers.
 - C Repeated movements such as pacing or head-bobbing.
 - D Trying to communicate with visitors.
- 17 **What limitation of zoos is highlighted when they are compared with the wild?**
- A Zoos cannot prevent all animals from escaping.
 - B Zoos cannot truly reproduce animals' natural surroundings.
 - C Zoos cannot stop visitors from disturbing animals.
 - D Zoos cannot keep endangered species alive.
- 18 **What does the term connected with captive-animal stress refer to here?**
- A A disease found only in polar bears.
 - B A safety rule used in animal enclosures.
 - C A training method used by zookeepers.
 - D Repeated harmful behaviours caused by confinement.

19 **Why is the polar bear example used?**

- A To show that polar bears are less intelligent than other zoo animals.
- B To suggest that polar bears are the only animals affected by captivity.
- C To make the habitat mismatch in zoos easier to imagine.
- D To prove that all large enclosures are equally cruel.

20 **What is implied by the comparison between zoochosis and human trauma?**

- A Captive animals usually recover quickly if moved to larger spaces.
- B Captivity can create deep and continuous stress for animals.
- C Zoologists now treat animals with human medical methods.
- D Human trauma is easier to understand than animal behaviour.
