

## BBC 6 Minute English Listening Practice

### Are Plant-Based Substitutes Healthier Than Meat?

Name: \_\_\_\_\_

Class: \_\_\_\_\_

Score: \_\_\_\_\_ / 20

| No. | Sentence                                                                                  |
|-----|-------------------------------------------------------------------------------------------|
| 1   | Some people reduce meat for health, animal welfare, or _____ reasons.                     |
| 2   | Plant-based alternatives help people get their daily amount of _____.                     |
| 3   | A listener worries that vegetable sausages may contain _____, flavourings and colourings. |
| 4   | To copy meat, producers add _____ after breaking down proteins.                           |
| 5   | Quorn uses _____, a protein from fungi.                                                   |
| 6   | Greg asks for Graham's _____, meaning his first instinctive response.                     |
| 7   | Graham is not worried about fungus if the product is _____.                               |
| 8   | Some vegetarians do not want alternative proteins to _____ meat.                          |
| 9   | Graham wants the product to be similar in flavour, texture, and _____.                    |
| 10  | Because products now vary, consumers have _____ of finding what they prefer.              |

#### What central question does the discussion explore?

- A Whether plant-based foods can fully replace traditional cooking.
- B Whether meat-free substitutes are healthier despite being processed.
- C Whether vegetarian consumers should avoid products that imitate meat.
- D Whether fungi-based foods are better for the planet than animal foods.

#### What concern does Graham raise about vegetable sausages?

- A They may not contain enough protein for a normal diet.
- B They may taste too different from traditional pork sausages.
- C They may be highly processed with added substances.
- D They may be too expensive for most meat eaters to buy.

Answers written in the margins will not be marked.

Answers written in the margins will not be marked.

**How does Graham react to learning that Quorn comes from fungus?**

- A He is disgusted because fungus sounds unnatural.
- B He is doubtful because fungus is not a familiar food.
- C He is amused but still unwilling to try the product.
- D He accepts it if the product is healthy.

**Why are flavourings and colourings added to meat-free sausages?**

- A To reproduce some qualities of meat.
- B To increase the amount of protein.
- C To remove the need for fungi.
- D To make the product less processed.

**What contrast is made between Graham and Greg's mother?**

- A Graham avoids sausages, while Greg's mother eats them regularly.
- B Graham wants meat-like substitutes, while Greg's mother does not.
- C Graham focuses on animal welfare, while Greg's mother focuses on health.
- D Graham prefers fungi protein, while Greg's mother prefers soy protein.

**What opinion does Graham express about plant-based sausage?**

- A It should be cheaper than pork sausage.
- B It should contain no flavourings or colourings.
- C It should be made only from natural ingredients.
- D It should be similar to meat in key sensory ways.

**In "I have no problems with that", what does "that" refer to?**

- A The idea that Quorn comes from fungus.
- B The question of whether sausages are healthy.
- C The use of colourings in meat-free food.
- D The comparison between pork and vegetables.

**What can be inferred about persuading meat lovers to try alternatives?**

- A Health alone may not be enough; sensory similarity also matters.
- B They will accept alternatives once they learn about mycoprotein.
- C They mostly reject vegetarian food because of environmental concerns.
- D They care less about taste than long-time vegetarians do.

**Why does Greg mention his mother?**

- A To prove that vegetarians dislike all processed foods.
- B To explain why plant-based products are usually healthier.
- C To show that consumers want different things from substitutes.
- D To argue that long-time vegetarians should eat more protein.

**What broader conclusion does the discussion suggest?**

- A Plant-based foods are accepted only when they perfectly copy meat.
- B Health, processing, and personal preference all shape food choices.
- C Meat eaters are unlikely to change unless doctors tell them to.
- D Vegetarian products are mainly designed for people who miss meat.
