What does Claudia Hammond suggest about the concept of 'flourishing' when she introduces it?

- A It is a term that has replaced the older concept of wellbeing entirely
- B It is a trendy psychological term backed by scientific research
- C It is a concept that focuses mainly on physical health and fitness
- D It is a newly invented idea with no connection to existing psychology

According to the Global Flourishing Study, what distinguishes middle-income countries from wealthier ones?

- A They recorded higher scores in financial stability and material comfort
- B They showed stronger performance in areas related to physical wellbeing
- C They outperformed richer nations in overall happiness across all categories
- D They ranked more highly in social bonds, generosity, and a sense of purpose

What does Phil's response when asked whether he is flourishing reveal about his outlook?

- A He expresses quiet contentment with his current circumstances in life
- B He admits he is uncertain whether he truly meets the criteria for flourishing
- C He suggests that external success matters more than personal relationships
- D He implies that flourishing is too vague a concept to apply to himself

What is the significance of the gender difference in flourishing mentioned in the programme?

- A Women consistently outperformed men in flourishing across all nations surveyed
- B Men in most countries reported higher levels of flourishing than women did
- C The direction of the gender gap in flourishing varied depending on the country
- D Gender was found to be the single most important factor in determining flourishing

What is Dr Peter Olusoga's view on the relationship between income level and flourishing?

- A He argues that financial wealth is the most reliable predictor of overall flourishing
- B He believes that prosperity and social fulfilment are equally distributed globally
- C He contends that richer nations fall behind in every dimension of flourishing measured
- D He implies that material comfort and human connection reflect different aspects of flourishing

What does Dr Olusoga suggest about practising gratitude as a strategy for flourishing?

- A It is a complex psychological technique that requires professional guidance to apply
- B It is most effective when combined with financial security and career achievement
- C It is a behaviour supported by evidence that can raise one's level of flourishing
- D It is a strategy that works only for people living in middle-income or poorer nations

What does the phrase "savouring" refer to in the context of the discussion?

- A Deliberately slowing down to appreciate positive experiences in a mindful way
- B Reflecting on past failures in order to set more realistic goals for the future
- C Pushing through difficulties quickly so that rewards can be enjoyed sooner
- D Sharing personal achievements with others to strengthen social relationships

What can be inferred about the relationship between "small wins" and long-term flourishing?

- A Small wins are only meaningful when they lead to significant financial rewards
- B Accumulating minor achievements is considered irrelevant to broader life satisfaction
- C Recognising incremental progress is seen as an essential part of a fulfilling life
- D Long-term goals should be prioritised over small wins to maximise overall wellbeing

What does Phil's incorrect guess about Indonesia reveal about common assumptions regarding flourishing?

- A People tend to assume that tropical countries produce happier and healthier citizens
- B Flourishing is widely believed to be determined primarily by cultural traditions
- C Most people underestimate the role that religion plays in national happiness rankings
- D Wealth and living standards are often mistakenly assumed to determine national flourishing

What is the overall message of the programme regarding how individuals can improve their flourishing?

- A Flourishing requires relocating to a country with stronger social infrastructure
- B Simple, research-backed habits such as gratitude and connection can enhance flourishing
- C Flourishing is largely determined by age and nationality rather than personal choices
- D The most effective path to flourishing involves achieving significant career milestones
